2616

DATE MAILED: 05/02/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/023,120

Applicant(s)

MANGOLD ET AL.

Examiner

Michael J. Moore, Jr.

Art Unit

2616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9, 11-23 and 25-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-9, 11, 12 and 14-18 is/are allowed.
- 6) ☒ Claim(s) 19-22 and 25-27 is/are rejected.
- 7) ☒ Claim(s) 13 and 23 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 February 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Drawings

1. Replacement drawings were received on 2/14/06. These drawings are acceptable and have been entered.

Claim Objections

2. Claims **13, 19-23 and 25-27** are objected to because of the following informalities:

Regarding claim **13**, on line 5, the phrase "said control signal" should be "said control frame" to be more precise.

Regarding claim **19**, an objection is made to the term "CCHC circuit" on line 5. This term should be instantiated "a centralized controller and hybrid coordinator (CCHC) circuit" in this first instance. Also, on line 8, an objection is made to the phrase "said predetermined time interval". It is unclear whether this limitation is referring to the "predetermined time interval" for the first stations or the second stations as claimed on lines 5-6.

Regarding claims **20-23, 25, and 26**, an objection is made to the phrase "The system" on line 1 of each of these claims, as claim **19** is rather directed to a "system local area network station".

Regarding claim **25**, there is some confusion regarding the limitation, "...*wherein said CCHC further operates to permit transmission of said plurality of first and second stations to transmit a data packet...*". According to this limitation, the CCHC is transmitting the stations themselves. It is believed that this limitation should read,

“...wherein said CCHC further operates to permit said plurality of first and second stations to transmit a data packet...”.

Regarding claim **27**, an objection is made to the phrase “The method” on line 1, as claim **19** is rather directed to a “system local area network station”.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims **19-22 and 25-27** are rejected under 35 U.S.C. 102(e) as being anticipated by Sherman (U.S. 7,031,274). *Sherman* teaches all of the limitations of the specified claims with the reasoning that follows.

Regarding claim **19**, “a system local area network station for receiving and transmitting data over a wireless channel between a plurality of first stations and a plurality of second stations in a wireless local area network (WLAN) having an access point (AP)” is anticipated by WLAN systems 101, 103, 105 in Figure 1 containing stations 111, 113, 115 as well as access points 112, 114, 116 as spoken of on column 2, line 62 – column 3, line 14.

"A receiver means for receiving data on the wireless channel" is anticipated by wireless antenna 203 (receiver means) of the STA/AP of Figure 2.

"A CCHC circuit configured to allocate a predetermined time interval for each of the first and second stations to initiate data transmission onto the wireless channel" is anticipated by the hybrid AP (CCHC circuit) spoken of on column 3, lines 3-14, that supports both 802.11 (first stations) and H/2 standards (second stations), and also allocates 802.11 and H/2 phases (time intervals) within the superframe shown in Figure 5.

"The CCHC circuit being further configured to transmit a data packet to the plurality of first and second stations over the wireless channel if the predetermined time interval is less than the time left before a scheduled start of a next frame by the plurality of second stations" is anticipated by the 802.11 CFP data transmission (predetermined time interval) in Figure 5 up until the transmission of a blocking frame sequence (X) (time left before start of H/2 MAC frame transmission) as spoken of on column 5, lines 41-67.

Lastly, "a signal processing circuit coupled to the CCHC to transmit and receive signals to and from the plurality of first and second stations, the signal processing circuit processing the received signals to permit the plurality of second stations to transmit a data packet to the AP over the wireless channel, the data packet including a shorter duration than the predetermined time interval" is anticipated by the data processing component 207 of STA/AP 201 of Figure 2 that receives data entered from a computer

unit and transmits received data from the radio unit to a computer unit of the WLAN as spoken of on column 3, lines 15-23.

Regarding claim **20**, "a transmitter means for transmitting data on the wireless channel" is anticipated by wireless antenna 203 (transmitter means) of the STA/AP of Figure 2.

Regarding claim **21**, "wherein the CCHC further operates to inhibit transmission from the plurality of first stations when permitting the plurality of second stations to transmit a data packet" is anticipated by the use of a management frame "X" to permit blocking and spoofing before H/2 transmissions as shown in Figure 5 and spoken of on column 5, lines 50-67.

Regarding claim **22**, "wherein the CCHC further operates to control the wireless channel within a specified range of time $[t_1, t_2]$ to permit the plurality of second stations to transmit a data packet" is anticipated by the H/2 MAC frame phase (range of time) within the CFP shown in Figure 5.

Regarding claim **25**, "wherein the CCHC further operates to permit transmission of the plurality of first and second stations to transmit a data packet having a shorter duration than the predetermined time interval over the wireless channel if the predetermined time interval is less than the time left before a scheduled start of a next frame by the plurality of second stations" is anticipated by the 802.11 CFP data transmission (predetermined time interval) in Figure 5 up until the transmission of a blocking frame sequence (X) (time left before start of H/2 MAC frame transmission) as spoken of on column 5, lines 41-67.

Regarding claim **26**, “wherein the plurality of first stations includes 802.11 compliant systems” is anticipated by the 802.11 stations spoken of on column 3, lines 8-14.

Regarding claim **27**, “wherein the plurality of second stations includes HIPERLAN/2 compliant systems” is anticipated by the HIPERLAN/2 stations spoken of on column 3, lines 8-14.

Allowable Subject Matter

5. Claims **1-9** and **11-18** are allowable over the prior art of record.
6. Claim **23** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims **1-8**, these claims are allowable for the reasons indicated in the previous Office Action.

Regarding *amended* claim **9**, this claim is now allowable for the reasons indicated in the previous Office Action pertaining to claim **10**.

Regarding claims **11-18**, these claims are further limiting to claim **9** and are thus also allowable over the prior art of record.

Regarding claim **23**, *Sherman* teaches the station of claim **22**. *Sherman* fails to teach where the time range is determined according to the claimed equation.

Conclusion

Art Unit: 2616

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ho et al. (U.S. 7,031,287) is an additional reference considered pertinent to this application.

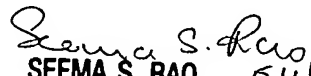

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Moore, Jr. whose telephone number is (571) 272-3168. The examiner can normally be reached on Monday-Friday (8:00am - 4:30pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema S. Rao can be reached at (571) 272-3174. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
